

Uni-Blinds®

Solar Powered

Automated System SL20-22F

For more information on our full range of unique products, please visit www.morleyglass.co.uk

We are delighted to bring to the UK market the latest in innovative and ecological Italian design.

SL20-22F is the new battery operated motorised blind system comprising Venetian or pleated blinds encapsulated within a 20 - 22mm cavity double glazed unit.

Operation

The encapsulated blind is raised and lowered, and in the case of the Venetian blind slat-tilted, via a discreet push button control which is magnetically attached to the double glazed unit. A remote control option is also available. The system is powered by standard long-life rechargeable batteries and is supplied with a cleverly designed battery charger.

Applications

UniBlinds are particularly suitable for commercial, medical and educational environments including offices, schools and colleges and clinics and hospitals as well as for private and residential use.

Benefits

- No wires or electrical contacts required
- Hi-tech design and specification
- Straightforward installation procedure
- Suitable for all styles of windows, doors, bi-folding doors and partitions including retro-installation into existing frames
- Maintenance free

SL20-22F

Automated System SL20-22F

The SL20 -22F is powered and charged via an external solar panel.

Benefits

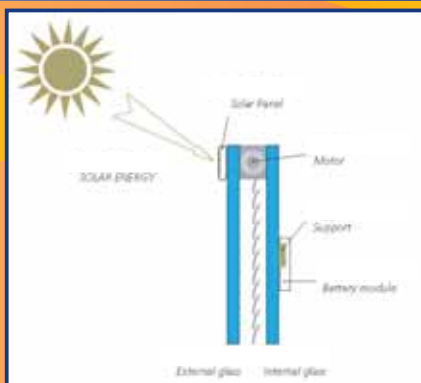

- energy saving
- hard wired power supply not required
- no need for electricians

Battery module	Solar panel	Remote control

Solar Energy Transmission

Solar Energy Operation

- 1 The sun irradiates the panel
- 2 The solar energy accumulated in the panel is fed to the battery module, recharging it
- 3 The battery module provides energy to the motor
- 4 By pressing the push button on the battery module or remote control, the motor is activated and the blind can be tilted, raised or lowered.

Solar Energy Operation

Any Uniblinds® product can be enhanced with high performance Saint-Gobain glass from our extensive portfolio. To view the full range of options please visit
